IN presenting our little catalogue for the season of 1924, we can assure you that we have listed only those varieties that have been tried out in our own gardens.

These have produced the best of results under average conditions and will do well for anyone who is in a position to devote a little time to the weeding, cultivating and other attention, so essential to good plant growth.

In placing an order with us, you may rest assured that it will receive our most careful personal attention and that the roots will reach you in good condition.

As we have no control over them after delivery, we cannot guarantee that they will live and thrive, but if any roots are not satisfactory, they may be returned to us, by prepaid parcel post and we will replace them, or return your money.

All divisions are from strong, healthy stock and guaranteed true to name.
